Run motherfack run. Time killer. love games like these, its very simple. Given the controls and interface, I can only assume this was meant to be a mobile game. Ended up with a coupon, got it for 20 cents. Still couldn't make it worth my time.. Got it for cheap with a coupon. to be earnest, its a great game, if its on mobile. on pc, it just feels like a un-optimised mobile port, with bad control that don't work half the time. the only button that will work is properly the uninstall button.

Don't recommend getting it for playing on pc. maybe it works with touch on a 2in1? otherwise get it for the cards but only if you have a coupon for it like i did.. I logged in Steam got an inventory notification and saw the coupon for Lamp Head and used it. Game cost me 20 cent. Sadly I shouldn't call Lamp Head a game. It's more an exercise in patience than anything that could be called a game. The worst part is even getting it as cheaply as I did, the game still feels like a slight. All the systems for this to be an F2P game are in place. Unless you can get it for dirt cheap don't purchase Lamp Head.

pretty good game. It's really bad. If I'm being honest, I only got this game because of the -90% coupon. The game is just a simple timewaster you can play while waiting for your favourite game to update or download. My opinion is mixed, but it is what I expected for its price. I never had motion sickness before, no matter what. This game exposed me to this funny condition with its endless up/down jumps on great speed. I might need to keep it in my library for a little longer to play more, but no, thanks :). remember when steam didn't allow mobile apps. I paid 14 cents for this and I don't regret it!

I Can't say that for most of less than 1 dollar games in Steam.

This is not shovel ware, it's actual and very simple game.

Yes it looks and plays like mobile game port, but as far as I have been playing it has been doing it mostly fine.

Only thing that I don't like is that it's so much mobile game port, that there is ingame ads (about games own products). Usually those are removed from Steam releases.

Still cool and fun game for a while and worth of my -90% coupon and 14 cents.. fairly good game considering the price of it. BTW i got it with steam 90% off ticket so it is quite cheap. pretty good game
