### About This Content

On the beautiful island of Tropico, it never rains; El Presidente insists on it. So when the clouds roll in and the rain starts to fall you know something is on the way. Rumours are that a group of citizens have united to form a mysterious cult and have placed a curse over Tropico. A new supernatural authority is looking to seize power and you, as El Presidente, need some divine assistance to lift the curse. Enter, the Inquisition.

Bring the special services provided by the Inquisition to Tropico and keep them in good favour by building them a new HQ from which to bring down the cultists and their supernatural wrongdoings. But don't let them have too much power. Make sure you remind them that only you, El Presidente, is the one true ruler of Tropico. Only through your careful management can you guarantee that Tropico returns to the island paradise it was before.

- New standalone scenario: "Tropical Redemption" – Banish the cultists from your island and lift Tropico from its curse
- New building: Inquisition – Spy on factions and unmask the roles of each faction member
- New dynasty avatar accessory: Inquisitor's hat
- New sandbox map: Isla del Rey

Got 2 hours to spare and wanna do nerve-wrecking puzzle? You got this.. I wish the main game was focused on bonus games, not other way around. Other than that, it is a nice game, plenty of types of solitaires amongst bonus games, looks nice, and main game is good.. A little bit of frost from Everlasting Summer. A magnificent end. Your choices matter. There are real consequences, and you can act however you wish. Or hold a dark mirror up to yourself, and maybe learn something.. A thoroughly unique sound-based fps well worth the asking price!. Too short.

Realistically, given the amount of assets that are in the game for environments and characters, this could have been longer, more in depth and a richer storytelling experience. Its good, but its REALLY short.

Short games can be good, and this is arguable a so-so story, but it feels like corners were cut and the writer just wanted to finish the thing and be done with it rather than expand it into a richer experience.

This game is really not worth buying. There is not much new things in the game. The story plot is incomplete, the combats are repetitive, and the equipments is boring. There is nothing challenging. I truly regret buying this game.. Once upon a time I was a very solid baseball player. Not here to brag on, only using that to preface what I'm about to say. Swung as hard as I could as if swinging a bat, 410 ft homer. Next hit was a glorified bunt swing meant to just hit the ball based on trajectory, 470 ft homer. What?! It's a decent party game if you're looking for just some basic fun. If you're looking for anything beyond just a little party fun, pass.. its very good for fast jobs.

please add "select frame by frame". its very necessary^^

update: please add just cutting one video file feature. i want to cut just one video file. can you add this?

updated reiew: you are just amazing! with last update we can select frame by frame!  
this is the best!

thany you!. good game, keeps me on edge. Doesn't work.... This is a hard one, I like the game and is actually fun to play, it lacks controller support which should be mandatory for this kind of game. The main menu it's terrible, you mouse over anything and it'll be selected. The actual game is very fun to play but no score whatsoever, no goals to reach. I think the game has lots of potential but it needs something else to grab the players. I recommend it AT a lower price, it is not worth what is asked at this stage.. Sadly the game didn't feel as fun as Job Simulator.. I want to know If I can play with random people that i dont know and not have to do a livestream or anything. Also, it won't open the game and keeps glitching out trying to open. Anyone have answers?. Hard game, bad graphics. Could be stimulating for some people though.. I must confess this felt so much like a 9 Clues game, I had to check whether it was the same developer or not. Turns out it isn't.

Those unofficial Scooby-Doo spin-offs are some of the most hilarious “so bad it’s good” stuff you can get on Steam. Like 9 Clues 2, the story is a mix of some of the silliest writing, allied with abysmally FAILED deduction sequences. The resulting cocktail can be awesome—if you are in the mood for it.

But this game reaches new depths its *prestigious* model didn't dream of, as even the hidden objects sequences haven't been checked for bad spelling (Who doesn't like to wear a bowl at a party, instead of a tie), or even for proper translation for that matter (you are going to be surprised by what a “necklace” or a “glass case” are supposed to be).

The main villain is Mr. Freeze cosplaying as an Ewok, for Christ's sake!

I wish I could recommend it, but gaming-wise, the puzzles are also some of the stupidest ever. Quite a few of them are Playskool complexity levels.

Anyway, thanks for the laughs, game, but as you say it:

Thank God there is always a new day, where you can start at the beginning of everything.
